Seanix Ruggedized Notebooks

Made of aluminium-magnesium alloy

The Seanix Durabook Series was engineered to survive and thrive under real world computing conditions. It features a drop resistant, 20-times-harder than plastic alloy base case with an anti-shock mounted LCD screen and hard drive, protecting from damage and data loss. Spill resistant keyboard, touch pad and scroll buttons keep water away from internal components. **All backed by a three-years Warranty!**

Key Components Protected:

- ▶ **Chassis:** The case is composed of aluminum-magnesium alloy, which is 20 times stronger than ABS plastic cases. The aluminum-magnesium alloy case provides added protection to all of the other critical components.
- ▶ **LCD Screen/Hard Drive/Memory:** The LCD screen, hard disk drive, and memory module are encased in rubber to absorb impacts from accidental blows to the notebook computer.
- ▶ **Keyboard and Motherboard:** The spill resistant keyboard, fully insulated touchpad area, and spill tray can withstand liquid spills, such as coffee or sodas.
- ▶ **Optical Drive:** The optical drive has a lock that prevents unintentional tray and disc ejection.
- ▶ **Battery Protection:** Double protection smart battery circuitry prevents damage caused by electric current or voltage surges and overheating. Smart battery calibration helps fight the loss of battery capacity after repeated charge/discharge cycles.

Seanix Durabook for \$1,847

- Intel® Pentium® M Processor 770
- Microsoft® Windows® XP Professional
- 15" XGA Display (1024 X 768)
- 512MB DDR2 Memory
- 80GB 5400RPM
- DVD +/-RW Dual Layer
- Gigabit Ethernet LAN
- Intel® Pro/ Wireless 802.11g
- 3 Years Warranty
