# Testimonials of MicroAge Installed Virtual Private Networks

"Upon the conclusion of our Petro-Canada "Managed Goods and Services" (hereafter called MG&S) process, MicroAge has been selected as our preferred supplier for the scope of work described in RFP SCBDM112000.

MG&S is a comprehensive and detailed process intended to identify and select a supplier who can solve, for Petro-Canada, a complex business issue at the best possible value.

Sample VPN for Chatham, Petrolia, Bothwell & Essex.

Based on our evaluation and selection criteria MicroAge scored higher than your competitors and was therefore selected as our supplier of choice.

The competition was fierce and your efforts significant, we appreciate all of the hard work put into this project and look forward to working with you on the implementation, sustainment of the project and of course working together as partners towards continuous improvement."

**-Brent McFarlen Senior Advisor,  
Petro-Canada Supply Chain  
Management, Mississauga.**

MicroAge Chatham is implementing Virtual Private Networks for the Petro-Canada Marketers and their satellite offices across Canada.

## *What Clients Are Saying About VPN'S*

"We embraced the wireless technology because we know that you guys provide good service. There is also a significant cost savings over our fractional T1. The wireless burst efficiency is huge! When we need the bandwidth, we know that it is there."

The VPN for Active Burgess Mould & Design connects their Wallaceburg plant with their new sister company in Windsor.

**-Shaun McArthur, Active Burgess Mould & Design.**

The Community Care Access Centre uses the high speed wireless infrastructure in Chatham-Kent to create a Virtual Private Network. This allows for seamless wide area network services between the Public General Hospital campus, the St. Joseph's campus and Sydenham Hospital campus linked back to the Community Care Access Centre. The added benefit is super-fast internet access as a bonus.

**-Vicki Harkness, Information Systems**

**Chatham-Kent Community Care Access Centre.**

"The reliability of the [Virtual Private] network is a testament to the professionalism and calibre of the technical staff the MicroAge office. The depth of their technical knowledge made our transformation from Main Frame to Client Server appear seamless to many. I would attribute the quick response/repair time of WAN issues to this same attribute. Of the solution providers we spoke with, this group was not only competitively priced but also kept the discussions at a level commensurate with our experience. As we progressed, so too did their explanations. The hardware recommended by Micro Age has been extremely reliable. Micro Age has supported us by having at their location, backup inventory of the networking components."

The VPN for Mallory connects their head office in Blenheim, Ontario to Souix City, Nebraska.

**-Rick Borst, Manager Information Technology**

**Mallory Industries**

"This is the most exciting technology since the proliferation of the Internet. High speed information exchange is now available at a significantly lower price."

**-Wally Romansky, General Manager MicroAge Chatham.**
