## *Wireless High Speed Internet*

### Benefits:

- Incredible Performance. Faster than Bell at a fraction of the cost.
- High Speed Internet is always on, to all users.
- Wireless service is Synchronous<sup>1</sup>, which is ideal for a Virtual Private Network.

### What you need:

- Wireless Kit \$3,987.
- Tower on or beside your building to obtain line-of-sight to the water tower. Price quote is available upon site inspection.
- Hardware firewall data router for about \$1,298.
- Install & configure the system by MicroAge is \$97/hr. Programming of the Bridge units \$750, programming the firewall router \$500.
- Monthly Internet Access is \$250/mth assuming 512k\* average daytime Internet usage, or \$400/mth for 1.5Mbps\*.

*Watch the world  
turn wireless.*

"The wireless connection to Chatham Internet Access has proven to be a stable and economical Internet connection to communicate with our Toronto and Hamilton offices. We have eliminated the high monthly cost of dedicated frame relay lines with a solution at a fraction of the cost. An additional benefit is that we also have Internet on our desktops at T1 speeds without the T1 cost."

-Brent Bonvarlez, General Manager

1. Synchronous means the same speed up as down to the Internet. Unlike DSL where you can get up to 1.5mb/s down, but only 160k up.  
\* Limit of 20Gb per month then \$20 per Gb for all services.
