## What Clients Are Saying About Wireless

"We are very satisfied with the service and efficiency of your staff and it is also exciting to be able to take advantage of this new and exciting technology! The wireless network has given us a very stable network with greater bandwidth and has enabled us to be more productive between our offices. In addition, I am pleased to say it is available at a very affordable price. We have no hesitation in recommending this technology or the services of MicroAge to others.

**-Alan McGuigan, Operations Manager  
Resistance Welding Products.**

"We previously had an ISDN connection with Chatham Internet Access and while we were planning for our recent move, we found that Bell could not provide ISDN to our new location. The wireless solution provided by MicroAge and Chatham Internet Access has fulfilled all promises. It is a much faster connection at a price substantially less than a comparable frame relay connection."

**-Greg Sparling, Director of Information Systems  
R.M. Auto Restoration.**

"With the amalgamation of Chatham Kent Integrated Children's Services, we needed speed to connect the different locations at a reasonable cost. ISDN couldn't provide the bandwidth and laying fibre wasn't an option. The wireless system setup to connect our three offices was easy to setup and manage. This service is efficient and fast. Your service guys are good!"

**-Mike Errey, Certified Netware Engineer  
Chatham-Kent Integrated Children's Services.**

"The key issue for us is that we have centralized systems resources. It is difficult to manage duplicate systems & information at two different locations. This simplifies our data management. We wanted information used transparently at the other location with the services all located at one site. We got 44 times the bandwidth for marginally more money than what we were paying to Bell!"

**-Kevin Bechard, Computer Systems Manager.  
Aar-Kel Moulds Ltd**

MicroAge 162 Queen St. Chatham N7M 5L1 (519)352-2112 Fax 352-2095

## *What Clients Are Saying About Wireless*

"The wireless connection to Chatham Internet Access has proven to be a stable and economical internet connection to communicate with our Toronto and Hamilton offices. We have eliminated the high monthly cost of dedicated frame relay lines with a solution at a fraction of the cost. An additional benefit is that we also have internet on our desktops at T1 speeds without the T1 cost."

**-Brent Bonvarlez, General Manager  
Iceco (Great Lakes Ice).**

MicroAge Chatham recently installed a Wireless solution to connect the City Hall to the municipal offices on Grand Ave. We worked together to provide a custom solution using Cisco routers to segment and direct the network traffic.

"We just love the [new wireless] compared to the previous ISDN connection. This solution is at least twice as fast. The ISDN was often clogged. The wireless speeds things up in general."

**-Justin Luth  
Municipality of Chatham-Kent.**

"With the high speed of the wireless setup to the internet, we have moved our web and ftp sites to our building. This is important for us as we can now locally manage our server, giving our clients their own private ftp accounts. We now move files back and forth with ease. We can't believe how fast it is. All of the users are very satisfied."

**-Mike Decock, Waltec Forgings Inc.**

"We embraced the wireless technology because we know that you guys provide good service. There is also a significant cost savings over our fractional T1. The wireless burst efficiency is huge! When we need the bandwidth, we know that it is there."

**-Shaun McArthur, Active Burgess Mould & Design.**

"This is the most exciting technology since the proliferation of the Internet. High speed information exchange is now available at a significantly lower price."

**-Wally Romansky, General Manager MicroAge Chatham.**
