Wireless Wide Area Networking

Speed?

Up to 72mb/s! Ethernet. Simply connect the wireless bridge unit with an Ethernet cable to your network hub. The dish on your roof provides the link to your remote site.

Distance? [2.4 Ghz +new 5.3 & 5.8 Ghz!]

The Wireless system can go up to 75kms! Also new technology may not require clear line-of-sight.

What kind of Networks?

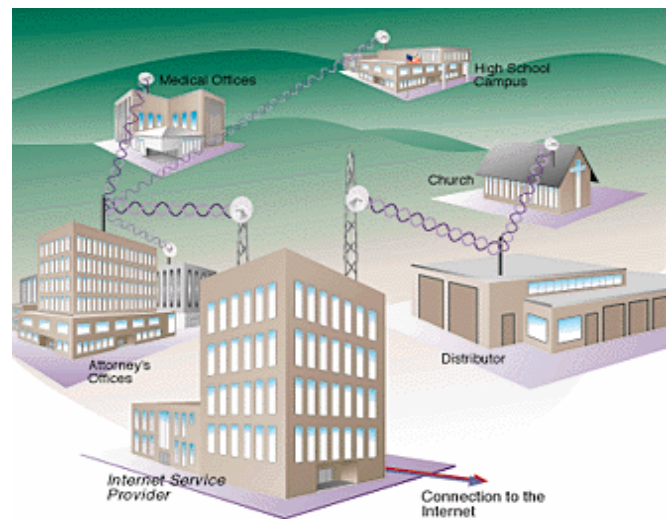

Supports all kinds of network protocols, such as Novell, Windows server, or simple peer-to-peer LAN's. MicroAge can even set up a Wireless system in your building, so that you can be free to move about, un-tethered by wires.

What is Involved?

- MicroAge to visit and evaluate your needs.
- Tower/mast on/beside your building to affix the antenna for best signal reception.
- MicroAge installs, configures & tests the system.
- There are no monthly fees. This provides a wide area network connection to your remote site.

"Endorse the wireless that MicroAge has installed for us?"

...Our answer is an undeniable YES!"

What about Internet?

We can form a partnership with your preferred ISP to create a high speed link for Internet access. We can even use Wireless in conjunction with DSL where available.

Many options are available. Call now for a free site visit and consultation. (519)352-2112.
